here are the **financials for Bioventures**

Here, Donald Depriest gives Bioventures financials out for purposes of attempting a \$600,000 sale of his, or some of his, shares in Bioventures. He is a Director, on the Board, as he writes below.

Financials Depriest indicates below show "massive profit margin"

See MCLM Auction 61 assertions: nothing disclosed for Bioventures gross revenues.

Here, and reflected in public information (Google it), Bioventures is substantial. Also, it held interest in MCT controlled by D. Depriest.

Subject: Potential transaction

Dear Bob,

[Qtel - another Depriest affiliate?]

As time has worn on with **our MCT transaction**, I, like a number of other shareholders, have used my cash and have taken on sizeable obligations. I have advanced funds to several MCT shareholder friends who made commitments based on **our Qtel** deal last year. This gives rise to this message.

I have 100,000 shares of BioVentures, Inc. I would like to sell and want to see if the following interests you.

I will sell these shares to you, or someone else you might like to participate, at \$6.00/share and provide a one year put back to me at \$8.00/share. There is a strong chance the company will sell entirely or license/sell some of its portfolio of intellectual property comprised of about 50 patents not necessary in its ongoing business during the coming year. **Tom Dewey, Jr., in New York**, is handling this for the company. I would like a call for six months at \$9.00/share which would mean a six month's period if the call expires where you would get all the upside if the company sells, and if you decide not to put the shares back to me after a year then the upside (or downside) would belong to you until the liquidity event.

BioVentures has been in business 20 years, is located in Murfreesboro, Tennessee, and has as advisors, Dr. John Phillips, a Vanderbilt genetics researcher, formerly had Dr. Stanley Cohen, and has Jim Hudson who owned Research Genetics in Huntsville that he sold to Invitrogen for \$150 Million +. **The Board is composed of Elliott Dawson**, founder and genius, Bill Sullivan former CEO and Chairman of Burroughs-Wellcome and former Chairman of Myriad Genetics – Bill is also on the Board of a technology development company somewhere in Arizona, Benson (Ben) Sloan who moved to Nashville with Manufacturers Hanover and went into the venture business about 20 years ago, **and myself**. As you can see from the financials there is **a massive profit margin** in the research products **now being sold** and a new product has been released, **micro-ma**, that is applicable to Big Pharma and is positioned for huge growth. The micro-ma can identify tens of thousands of bacteria/pathogens through a tiny piece of tissue or body fluids and can avoid the drawing of blood that is sent to the lab for analysis that may hit or miss when the results are in. There are other new products in the pipeline that have already been through R&D.

Depriest - a Board member of Bioventures

You may see the company and its products at the website, www.bioventures.com.

Bob Sullins, who was formerly on the Board of BioVentures, is holding these shares for me. He is with

Smith-Barney and resigned from BioVentures Board a few years ago because of Smith-Barney's policies regarding private activities. He has handled transactions of BioVentures shares for others at \$5.50 to 6.00/share two or three years ago. Bob is also a substantial shareholder of MCT, holding about 30,000 shares individually and probably another 20,000 shares through his family investment vehicle, SSS Investors. Let me know if you would have interest in this. Once we get MCT sold I am very interested in your participating in a few things I have placed on the back burner, waiting for our closing, such as low cost, portable, very accurate seismic for oil/gas exploration and identification, fracturing shale with intermittent or constant sound waves to give up the oil that presently can not be recovered, oil/water separation on a large scale in a closed system (a unit performing this at FEDEX in Memphis takes all their sump fluids and separates so that the separated water has less than 15 ppm and goes directly into the Memphis sewer system with no treatment). It works automatically, with very low maintenance, on crude oil and oil polluted bodies of water as well. None of these will require much equity investment and we can also look at the Mighty Engine.

Will talk to you some time tomorrow together with Robin. I will depart for Istanbul Sunday night or Monday for our Tuesday session with Serkan, et al.

Best,

Don
